

Philips Primary Atlas for the Caribbean

Philips Primary Atlas for the Caribbean combines brightly coloured maps with clear, concise text, plus explanatory diagrams, satellite images and illustrations - ideal for students interested in Caribbean history and geography. The introductory pages explain how to understand maps in general, with scale, direction, and latitude and longitude clearly described, before moving on to special maps of the Caribbean region as a whole. The detailed coverage includes topographical maps of Trinidad and Tobago, Jamaica, the Cayman Islands, Belize, Bermuda, the Bahamas, Dominica, St Lucia and Barbados, together with the other countries and islands of the Caribbean, plus informative thematic maps on land use, climate, population, tourism and trade. There is a special focus on the key local themes of the Caribbean region as a whole - its physical environment, history, people, agriculture, industry and commerce. A World section completes the atlas, including topographical maps of the World and its continents, plus thematic maps on such topics as climate, the environment, people, energy and resources. The 4-page index provides letter-figure grid references to over 2500 place names and features.
