

Case Studies in Ecotourism

As a counterpart to the growing volume of more theoretical literature in ecotourism, this volume presents a global compilation and analysis of over 170 real-life case studies in ecotourism, selected after an extensive screening process. It includes ecotours on land and sea, ecolodges and resorts, private reserves and public parks. The case studies range from the worlds best models to test cases, small and large, unique to representative. Data has been drawn from independent audits by the author and others, as well as from published reports from universities, multilateral and non-government organizations. The book shows what ecotourism can achieve, what constraints it faces, and provides a convenient and comprehensive reference for ecotourism enterprises, development agencies and university teaching.
