

Oracle BPM 11g

Oracle Business Process Management Suite provides a complete set of tools for optimizing, creating, and managing business services. Oracle BPM 11g enables services to be created, managed, and orchestrated in a very powerful and intuitive interface that does not sacrifice quality. BPM is under the umbrella of other Oracle SOA products and as a result, integrates nicely with both Oracle and non-Oracle products. Oracle BPM 11g Suite plugs into heterogeneous IT infrastructures and enables enterprises to incrementally adopt SOA.
