

Chinese Women - Living and Working (ASAA Women in Asia Series)

This book presents significant new findings on new domains of employment for women in China's burgeoning market economy of the 1990s and the twenty-first century. Experts in gender, politics, media studies, and anthropology discuss the impact of economic reform and globalization on Chinese women in family businesses, management, the professions, the prostitution industry and domestic service. Significant themes include changing marriage and consumer aspirations and the reinvention of domestic space. The volume offers fresh insights into changing definitions of women's work in contemporary China and questions women's perceived disadvantage in the market economy.
