

Linux Network Administrators Guide

The Linux Network Administrators Guide, Third Edition dispenses all the practical advice you need to join a network. Along with some hardware considerations, this highly acclaimed guide takes an in-depth look at all of the essential networking software that comes with the operating system--including basic infrastructure (TCP/IP, wireless networking, firewalling) and the most popular services on Linux systems. But as the follow-up to a classic, the third edition of the Linux Network Administrators Guide does more than just spruce up the basics. It also provides the very latest information on the following cutting-edge services: Wireless hubs, OpenLDAP, FreeS/WAN, IMAP, Spam filtering, OpenSSH, BIND, IPv6. Featuring a litany of insider tips and techniques, the Linux Network Administrators Guide, Third Edition is an invaluable companion for any network administrator interested in integrating Linux into their Windows environment. Authored by Terry Dawson, Tony Bautts, and Gregor N. Purdy, the Linux Network Administrators Guide, Third Edition emerged from the Linux Documentation Project (LDP). The LDP's goal is to centralize all of the issues of Linux documentation, ranging from online documentation topics such as installing, using, and running Linux.
