

The New GATT: Implications for the United States (Brookings Occasional Papers)

The Uruguay Round trade agreement, recently ratified by Congress, was the eighth in a series of negotiations under the auspices of the General Agreement on Tariffs and Trade (GATT). Like the ratification proceedings, the negotiations were both contentious and extended. In the end, they substantially changed the structure of the GATT. From its traditional emphasis on reducing formal barriers to trade in goods, the GATT has now moved to a broader agenda of issues that will dominate in a more integrated world economy. The New GATT encompasses a set of agreements governing trade in goods, trade in services, the protection of intellectual property rights, and new procedures for resolving trade disputes. All of these measures are to be unified under a new institutional structure, the World Trade Organization. In this book, the major features of the new GATT are reviewed and assessed in terms of their implications for the United States. The contributors are Alan Deardorff, University of Michigan; Bernard Hoekman, the World Bank; John Jackson, University of Michigan School of Law; and Tim Josling, Food Research Institute, Stanford University. Susan M. Collins is a senior fellow in the Economic Studies program at Brookings and associate professor of economics at Georgetown University. Barry P. Bosworth, a senior fellow at Brookings, is the editor and author of numerous Brookings books, including *The Chilean Economy: Policy Lessons and Challenges* (Brookings, 1994) and *Saving and Investment in a Global Economy* (Brookings, 1993).
