

Markets, Information and Communication: Austrian Perspectives on the Internet Economy (Routledge Foundations of the Market Economy)

The internet bubble which peaked in size in 2000 is now well and truly burst. As with all bubbles, there are varying explanations for its occurrence, but the hype which surrounds the internet has shouldered a lot of the blame. There is however, no doubt that the internet has significantly changed the way people live, think and do business. This impressive volume presents the Austrian school of thought and its considered response to the internet economy. Contributions are from such figures as Peter Boettke, Richard Arena and the late Don Lavoie (to whose memory this book is dedicated). With impressive clarity and insight, the book covers such areas as: Austrian theories of the firm and the internet economy entrepreneurship and e-commerce private lawmaking on the internet Hayek and the IT entrepreneurs.
