

How to predict the weather with a cup of coffee: And other techniques for surviving the 9-5 jungle

How to predict the weather with a cup of coffee and other essential techniques for surviving the 9-5A smart, spoof survival guide to the 9-5. Ray Mears and Bruce Parrys advice is all very well if youre stuck up the Amazon without a paddle, but what about finding your way to a seat on a crowded bus, predicting the weather with a coffee in Starbucks or getting rid of cold callers with a microwave? Urban Bushcraft shows how to dust off your native survival instincts and update them for the modern world whether its negotiating the car park at Ikea, anti-interrogation techniques at customer service desks, or navigating by electricity pylon.Harnessing the laws of science, nature and human behaviour, this book revisits and reinvents the tricks that got us through our savage past and updates them for the 21st century. It arms you with a cavemans toolkit for survival wherever you may be Starbucks, the office, or a crowded tube on a Friday night and tells you all you need to know to transform your daily grind into a non-stop adventure (you dont even have to wear khaki).
